Relevant Coursework: Full stack web developement, Software Engineering, Database Management Systems,
Data Structures & Algorithms, Object-Oriented Programming.

HSC, Rajarshi Shahu Jr College, Latur (82.33%)   2024
SSC, Swami Vivekanand Vidyalaya, Trikoli (97.40%)   2022

SKILLS

Programming Languages	C	C++	JavaScript	Python	
Frontend Tech	HTML5	CSS	React	React Native	TailwindCSS
Backend Tech	Node.js	Express.js	Axios	REST	Django
Tools	Git	Vite	Postman	VS Code	ChatGPT
Database	MySQL	PostgresSQL	Supabase	MongoDB	Firebase
Soft Skills	Communication	Leadership	Teamwork	Problem Solving	

EXPERIENCE

Website Secratary   Sept 2025
Indus Connect, VIT Pune   *Pune, India*

- Managed and updated website content regularly to ensure accurate and engaging information.
- Collaborated with the technical and design teams to maintain site functionality and performance.
- Ensured smooth navigation, responsive design, and a user-friendly interface across devices.
- Assisted in implementing new website features and resolving minor technical issues promptly.

PROJECTS

AyurSutra - Patient Management Application User-facing platform for patients to book Panchakarma therapies, track treatment progress, receive multi-channel notifications, access educational content, and follow personalized lifestyle/dietary guidance. Available as a responsive website.(Github)

GharBudget – Household Expense Manager It is a React Native app that helps users track expenses, set budgets, and view spending insights via interactive charts with Firebase sync. I designed the responsive web interface for a seamless user experience, enhancing my teamwork, design, and time management skills.(Github)

Career Craftly Student Community Club website for showcasing a college club's activities, members, and announcements. It allows students to join the club, stay updated on events, and provides admins with tools to manage all content dynamically. (Github)

CopyCatch Assignment Plagiarism Checker is a TypeScript tool that detects plagiarism across multiple PDFs. It compares text using algorithms like KMP, Rabin-Karp, and Edit Distance, and groups similar files with graph algorithms for accurate, efficient plagiarism detection.(Github)
